

Amendments to the Specification

Please replace the sixth full paragraph on page 3, beginning with line 26 and ending with line 28 with the following rewritten paragraph:

Referring to Figure 3, display device 40 41 includes a housing having a base 42, a midsection 44, and an upper section 46, all having substantially flat front panels.

In fact, the front panel of midsection 44 could be eliminated altogether.
